

Long-Term Care in America: Concerns and Expectations among Hispanics

Conducted by The Associated Press-NORC Center for Public Affairs Research
Funded by The SCAN Foundation

Interview dates: February 18-April 9, 2016;

Interviews: Dual frame nationally representative sample of 1,698 adults 40 years old and older Margin of error for the national sample: +/- 3.4 percentage points at the 95% confidence level +/- 6.7 percentage points for the Hispanic sample

NOTE: All results show percentages among all respondents, unless otherwise labeled.

Q1. In general, how would you rate your overall health?

REVERSED ORDER FOR HALF OF SAMPLE

Some people need ongoing living assistance as they get older. This assistance can be help with things like keeping house, cooking, bathing, getting dressed, getting around, paying bills, remembering to take medicine, or just having someone check in to see that everything is okay. This help can happen at your own home, in a family member's home, in a nursing home, or in a senior community. And, it can be provided by a family member, a friend, a volunteer, or a health care professional.

Q10. Are you currently receiving this kind of ongoing living assistance or not?

Q33_2. As you may know, some states (including California/New Jersey/Rhode Island) allow residents to take up to four to six weeks off of work with pay in order to take care of a family member with a serious health condition. This family member can be a child, parent, spouse, or domestic partner, or in some states a grandparent, grandchild, sibling, or parent-in-law. Benefits are paid for by employee payroll deductions. The benefit is typically a portion of weekly salary.

Asked of California, New Jersey, and Rhode Island residents: Do you favor, oppose, or neither favor nor oppose this program?

Asked of all others: Would you favor, oppose, or neither favor nor oppose such a program in your state?

	Hispanic Sample 2/18-4/9/16	National Sample 2/18-4/9/16

N= 400 1,698

Q33_3. How comfortable would you be asking your employer for time off work under one of these programs if you personally needed to care for a family member with a serious health condition?

IF NECESSARY: This program allows/would allow residents to take up to four to six weeks off of work with pay in order to take care of a family member with a serious health condition. This family member can be a child, parent, spouse, or domestic partner, or in some states a grandparent, grandchild, sibling, or parent-in-law. Benefits are paid for by employee payroll deductions. The benefit is typically a portion of weekly salary.

Study Methodology

This study, funded by <u>The SCAN Foundation</u>, was conducted by The Associated Press-NORC Center for Public Affairs Research. Interviews were conducted by Interviewing Services of America between the dates of February 18 and April 9, 2016. Staff from NORC at the University of Chicago, The Associated Press, and The SCAN Foundation collaborated on all aspects of the study.

This survey of the 50 states and the District of Columbia was conducted via telephone with 1,698 adults age 40 and older. The sample included 1,117 respondents on landlines and 581 respondents on cell phones. The sample also included an oversample of Californians 40 years and older. The sample includes 526 residents of California age 40 and older. In addition, the sample included an oversample of Hispanics 40 years and older. The sample includes 400 Hispanics age 40 and older.

Respondents on landline phones were selected randomly within households. For households with two eligible adults age 40 and older, one respondent was selected randomly by the computer-assisted telephone interviewing system. For households with three adults or more age 40 and older, the respondent who most recently celebrated a birthday at the time of the call was selected. If the selected respondent was not available at the time of the call, interviewers were trained to set up a time to call back to speak with that respondent. Interviews were conducted in both English and Spanish, depending on respondent preference. All interviews were completed by professional interviewers who were carefully trained on the specific survey for this study.

The random digit dial sample, including the California oversample, was provided by a third-party vendor, Scientific Telephone Samples. The final response rate for the overall sample was 37 percent, based on the American Association of Public Opinion Research Response Rate 3 Method. Additionally, the final response rate for the California sample was 40 percent, and the final response rate for the Hispanic sample was 15 percent.

The sampling frame utilizes the standard dual telephone frames (landline and cell), with an oversample of numbers from the state of California, and a supplemental sample of both landline and cell numbers targeting households with Hispanic adults. The targeted sample was provided by Scientific Telephone Samples and Marketing Systems Group and was pulled from a number of different commercial consumer databases and demographic data.

Sampling weights were calculated to adjust for sample design aspects (such as unequal probabilities of within household selection) and for nonresponse bias arising from differential response rates across various demographic groups. Poststratification variables included age, sex, race, region, education, and landline/cell phone use. The weighted data, which thus reflect the U.S. population, were used for all analyses. The overall margin of sampling error was +/- 3.4 percentage points, adjusted for design effect resulting from the complex sample design. The California sample's margin of sampling error was +/- 6.7 percentage points, both also adjusted for design effect resulting from the complex sample design.

A complete study report is available on The AP-NORC Center for Public Affairs Research long-term care website: www.longtermcarepoll.org.

Long-Term Care in America: Concerns and Expectations among Hispanics

About The Associated Press-NORC Center for Public Affairs Research

The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest-quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press (AP) is the world's essential news organization, bringing fast, unbiased news to all media platforms and formats.
- NORC at the University of Chicago is one of the oldest and most respected, independent research institutions in the world.

The two organizations have established The AP-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals.

The founding principles of The AP-NORC Center include a mandate to carefully preserve and protect the scientific integrity and objectivity of NORC and the journalistic independence of AP. All work conducted by the Center conforms to the highest levels of scientific integrity to prevent any real or perceived bias in the research. All of the work of the Center is subject to review by its advisory committee to help ensure it meets these standards. The Center will publicize the results of all studies and make all datasets and study documentation available to scholars and the public.
