## Study Methodology

This study, funded by [The SCAN Foundation](#), was conducted by The Associated Press-NORC Center for Public Affairs Research. Staff from NORC at the University of Chicago, The Associated Press, and The SCAN Foundation collaborated on all aspects of the study.

Data were collected using the Foresight 50+ Consumer Omnibus, a monthly multi-client survey using NORC's probability-based panel designed to be representative of the U.S. household population of adults age 50 and older. The survey was part of a larger study that included questions about other topics not included in this report. During the initial recruitment phase of the panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection from the NORC National Sample Frame or a secondary national address frame, both with over 97% coverage of all U.S. addresses, and then contacted by U.S. mail, email, telephone, or field interviewers (face to face). Households were screened for having at least one adult age 50 and older. The panel provides sample coverage of approximately 97% of the U.S. household population. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings population. Of note for this study, the panel would also exclude adults age 50 and older who live in some institutional types of settings, such as skilled nursing facilities or nursing homes, depending on how addresses are listed for the facility.

Interviews for this survey were conducted between February 24 and March 1, 2022, with adults age 50 and older representing the 50 states and the District of Columbia. Panel members were randomly drawn from the Foresight 50+ Panel, and 1,762 completed the survey—1,642 via the web and 120 via telephone. Panel members were invited by email or by phone from an NORC telephone interviewer. Interviews were conducted in English and Spanish. Respondents were offered a small monetary incentive (\$3) for completing the survey.

The final stage completion rate is 26.0%, the weighted household panel recruitment rate is 17.1%, and the weighted household panel retention rate is 75.6%, for a cumulative response rate of 3.4%. The overall margin of sampling error is +/- 3.4 percentage points at the 95% confidence level including the design effect. The margin of sampling error may be higher for subgroups.

In addition, African American and Hispanic respondents were sampled at a higher rate than their proportion of the population for reasons of analysis. The overall margin of sampling error for the 432

completed interviews with African American respondents is +/- 6.6 percentage points at the 95 percent confidence level including the design effect. The overall margin of sampling error for the 401 completed interviews with Hispanic respondents is +/- 7.0 percentage points at the 95 percent confidence level including the design effect.

Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other survey.

Quality assurance checks were conducted to ensure data quality. In total, 7 interviews were removed for nonresponse to at least 50% of the questions asked of them, for completing the survey in less than one-third the median interview time for the full sample, or for straight-lining all grid questions asked of them. These interviews were excluded from the data file prior to weighting.

Once the sample has been selected and fielded, and all the study data have been collected and made final, a poststratification process is used to adjust for any survey nonresponse as well as any non-coverage or under and oversampling resulting from the study specific sample design. Poststratification variables included age, gender, census division, race/ethnicity, education, and AARP Membership. Weighting variables were obtained from the 2022 Current Population Survey and AARP. The weighted data reflect the U.S. population of adults age 50 and over.

Complete questions and results are available at <http://www.longtermcarepoll.org>. For more information, email [info@apnorc.org](mailto:info@apnorc.org).

Additional information on the Foresight 50+ Panel methodology is available at: <https://www.norc.org/Research/Capabilities/Pages/Foresight50.aspx>.

## About The SCAN Foundation

The SCAN Foundation is an independent public charity dedicated to creating a society where older adults can access health and supportive services of their choosing to meet their needs. Our mission is to advance a coordinated and easily navigated system of high-quality services for older adults that preserve dignity and independence. For more information, visit [www.TheSCANFoundation.org](http://www.TheSCANFoundation.org).

## About The Associated Press-NORC Center for Public Affairs Research

Celebrating its 10<sup>th</sup> anniversary this year, The AP-NORC Center for Public Affairs Research taps into the power of social science research and the highest-quality journalism to bring key information to people across the nation and throughout the world.

- The Associated Press (AP) is an independent global news organization dedicated to factual reporting. Founded in 1846, AP today remains the most trusted source of fast, accurate, unbiased news in all formats and the essential provider of the technology and services vital to the news business. More than half the world's population sees AP journalism every day.  
[www.ap.org](http://www.ap.org)
- NORC at the University of Chicago is one of the oldest and most respected, objective social science research institutions in the world. [www.norc.org](http://www.norc.org)

The two organizations have established The AP-NORC Center for Public Affairs Research to conduct, analyze, and distribute social science research in the public interest on newsworthy topics, and to use the power of journalism to tell the stories that research reveals. In its 10 years, The AP-NORC Center has conducted more than 250 studies exploring the critical issues facing the public, covering topics like health care, the economy, COVID-19, trust in media, and more.
